

The Front Loader is a new, wall mounted frame system that allows you to create zero clearance displays within recesses and obstructed areas.

The intelligent design means access isn't needed around the edge of the sign to install your print. This simple change opens up new opportunities including high-street signage, full-wall displays and even flush signage integrated within external cladding. Flex your signage like never before!

## Front Loader DETAILS

- Pairs with the famous Black Clip for ease of installation
- 70mm depth perfect for sleek illuminated applications like high-street signage
- Access to clip channel at the front meaning zero clearance is needed around the frame
- Wall-mounted frame for simplicity of installation on site
- Internal support pieces available for larger applications
- Two cover fixing options. Front fixing if recessed - Side fixing if there is access.
- Lengths available in 5.1m and 6.1m for more efficient manufacture

### Durable

Wind tested to hundreds of mph and zero system failures in over 30 years.

### Sustainable

Reusable clips coupled with aluminium extrusions that are fully recyclable

### Versatile

Lightweight, sleek yet super strong. Can be illuminated and zero clearance needed.

### Easy Assembly

No need for sewing, rods, clamps, eyelets or springs with our Black Clip System.
