

The Retro Frame is a versatile, light-weight Flex Face Frame System that would typically be used for non-illuminated applications.

Originally designed to convert old acrylic boxes into Flex Face ones, the Retro is now used as a frame system on its own and can be found in most industrial estates around the country. If you want to keep things light and simple, then the Retro Frame could be the product for you.

### Retro DETAILS

- Pairs with the famous Black Clip for ease of installation
- 90mm depth perfect for sleek, large-scale non-illuminated applications
- Two internal support options available for ultimate flexibility on site
- Full depth cover section to reduce powder coating costs
- Lengths available in 5.1m and 6.1m for more efficient manufacture
- Can be shaped to create lettering or match brand guidelines
- Channel designed to hide fixings and help with water run-off

#### Durable

Wind tested to hundreds of mph and zero system failures in over 30 years.

#### Sustainable

Reusable clips coupled with aluminium extrusions that are fully recyclable

#### Versatile

Lightweight and sleek yet super strong for large scale signs - can also be shaped.

#### Easy Assembly

No need for sewing, rods, clamps, eyelets or springs with our Black Clip System.
