

Height of Box  
Up to 1 metre.  
**- No Horizontal Supports -**

Height of Box  
Between 1 to 2 metres.  
**- 1 Horizontal Support -**

In instances where a box is built  
in sections, a Back Support  
must be placed directly either  
side of the break

Height of Box  
Example at 3 metres.  
**- 2 Horizontal Supports -**

At 3m high, vertical supports  
should be no more than  
750mm apart.

At 4m high, vertical supports  
should be no more than  
500mm apart.

- Both Vertical and Horizontal Back Supports cannot be more than 1m apart in any size box. When your boxes are larger, you should move the supports closer together to account for the additional weight and print size -
- When calculating section sizes, please factor in your transport to site and the installation process -
- This is just a general guide and every project needs to be looked at in isolation. Contact us for more advice -
