

We do it your Way-Finding

#### Curved Modular Way-Finding System

- Comprehensive solution
- A wide range of sizes
- Handles all graphic applications
- Easy to adopt
- Environmentally friendly

Vista System is a world leading curved way-finding system that offers comprehensive solutions for every project: suspended signs, flag signs, directories, double sided pylons, triangular pylons, post signs, table stands, and many more. No other curved system can offer such a comprehensive solution.

The system is designed to handle most applications and materials used in the sign industry (printed-paper, engraved, embossed, screen-printed substrates, photo-metal, photo-polymer, vinyl graphics, tactile, and more). The materials used include polymers and metals of all types, plastics, paper, etc. Any material with flexibility and the correct thickness may be used as an insert with Vista System frames.

Vista System is the only system featuring more than 80 different extrusions, creating unlimited widths and shapes. This wide choice of sizes and shapes allows the customer to stick to one sign system throughout a project, and to find solutions to almost any kind of sign required. Signs sized 16-400 mm have a complete vista profile.

Signs from 420 mm wide and up use the VBS profile which makes them lighter, greener and more cost effective, while still providing a solid frame.

**Gripper Extrusion:**

The VBS side channel has an inner track into which a special plastic profile, that is designed to grip and hold the insert in place, is inserted. This greatly improves the hold of the insert to the sign itself.

Standard finishes for vista profiles are silver and black anodized. Custom sizes and finishes are available upon request.

**End caps:**

Vista System offers both plastic and metal end caps. The end caps are available with screws for maximum security to avoid vandalism. Plastic caps are made of a custom formulated polymer of unique flexibility and resilience that can be painted. The metal end caps are made of aluminum with silver or black anodized finishes and include stainless steel screws.

**Screw bosses for structural purposes:**

Vista System offers a revolutionary solution for attaching and installing signs with no need for the welding and/or building of metal construction for support. A system of massive channels (screw bosses) for screws are inside the extrusion itself, enabling the construction of an enormous selection of elements within minutes and without any welding or special tools.

**Separation strips:**

Vista System offers an integrated system which allows a sign to be divided into separate changeable slats within one sign.

Vista System signs are very easy to update. Just pull out the clear cover, change the graphics and place the clear cover back!

Vista System frames can accept ADA technology inserts. We supply ADA inserts, ask your Vista rep. about it!

Vista System – a complete solution for the entire project!

**Vista sign sample case**

This elegant suitcase comes with 8 signs from various Vista System product to truly help customers make up their minds on the spot, by showing them exactly how their purchase will look like.

Wall Signs

**Wall Signs**

Create wall-mounted signs with the Vista frame extrusions using any flat, flexible substrate to produce a curved-face sign.

### Projecting Signs

The projecting signs are designed to accept standard size extrusions.

Three types of bases/brackets are offered:

- Wall Brackets (WB)
- Simple Base (WBSB)
- Flag Sign (FS)

### Directories

Vista System directories are fast, easy and simple to assemble and install. There is no need for special tools. The system has the advantage of flexibility to accept a variety of insert materials as well as the complete freedom to determine the height of each information strip, you decide how the sign will be sectioned by placing the separation strips as needed. Where? Wherever you decide, according to your design.

### Multi-Panel Directory

This directory is a combination made of a number of basic flush mounted directories which are installed in proximity to each other.

# Multi-Sign Directory

## Multi-Sign Directory

Vista System directory signs are easy to maintain and update. The advantages of this simple system are flexibility when it comes to the overall width of the sign and the ability to add additional panels. It offers a perfect choice, since its' innovative design allows for easy installation, removal and replacement of the signage, even by a novice.

### Kangaroo Table Stands

The "Kangaroo" table sign frame is offered as a complete package:

- Convex frame, aluminum base and end cap, clear/non-glare lens.
- Available in several sizes.
- Easy to assemble.
- Easy to change insert.
- Designed to accept standard paper or other sign substrates.

## Boomerang Table Stands

The "Boomerang" sign frame is offered as a complete package:

- Convex frame, end caps, clear/non glare lenses.
- Available in several sizes.
- Easy to assemble.
- Easy to change insert.

### Double Sided Pylons

Vista System offers a range of bases and end caps that utilize the built in screw bosses allowing all sign holders to be assembled using only a screwdriver. This feature of the system is used to create freestanding convex, double-sided signs to be used with standard sign substrates, without interior illumination. Great for show rooms, lobbies, parking lots, airports, hospitals, office buildings, campuses, libraries and more!

### Suspended Signs

Vista System standard profiles and end caps are used with specially designed connectors that are also cable clamps, to create unending combinations of vertical and horizontal curved double-sided suspended signs.

## Double Sided Post Signs

### Double Sided Post Signs

Vista's stylish posts are shown supporting a double sided sign with side-by-side posts, all Vista sign holders accept any sign material that is flat and flexible!

### Triangular Post Signs

A triangular freestanding sign utilizes a short post section and a matching base to support the main triangular directory element. An additional post section is used to set the header apart from the main element.

## Triangular Pylons

### Triangular Pylons

A triangular pylon, utilizing short sections of Vista post extrusions between frame sections to create an attractive way-finding system.

With Vista, customized signs are affordable. By using standard extrusions and components, custom designs are cost effective. Our staff will assist you in creating the product you need. Assembly is simple, and the only tool required is a screwdriver. Bases are available for both permanent and portable applications.

When you have a special application, there is no reason to hesitate! With Vista System's MCFT technology, we can provide almost anything. Simply contact us with your ideas and needs. We will take care of designing the type of customized Vista System applications you need. You have your own R&D staff without the expense!
